Instruction:

Start up

1.Tap kegs.

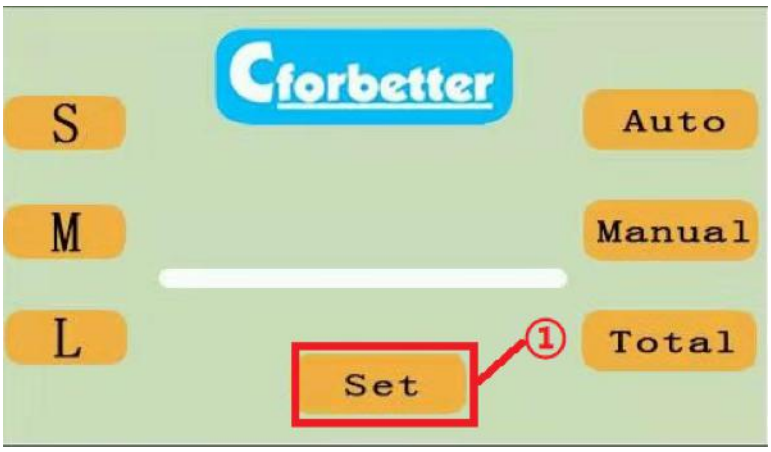

2.Make sure CO2 tank is on and all CO2 regulators are on.

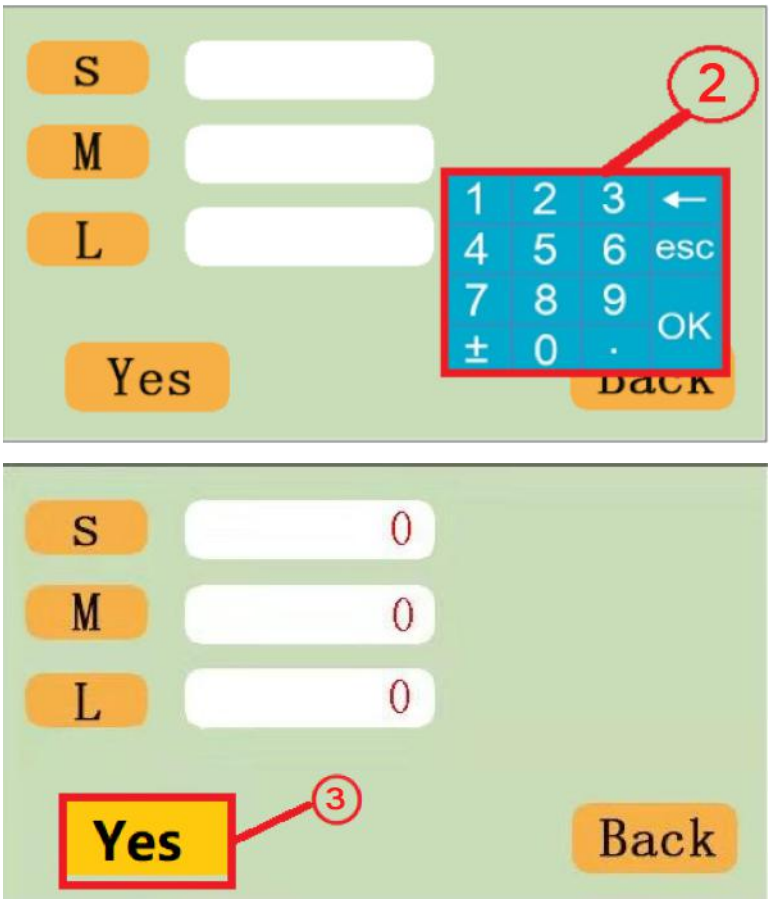

3.Holding a cup over the nozzle,press the Manual button,let the beer run until all of the air/foam is out of the line,then press the Manual button again to stop the beer flow.

4. Setting

Press SET to enter the setting page, corresponding to the three settings of S, M, L. Input the volume you want,and click “OK”and then click “Yes”.

Repeated as needed for other sizes.

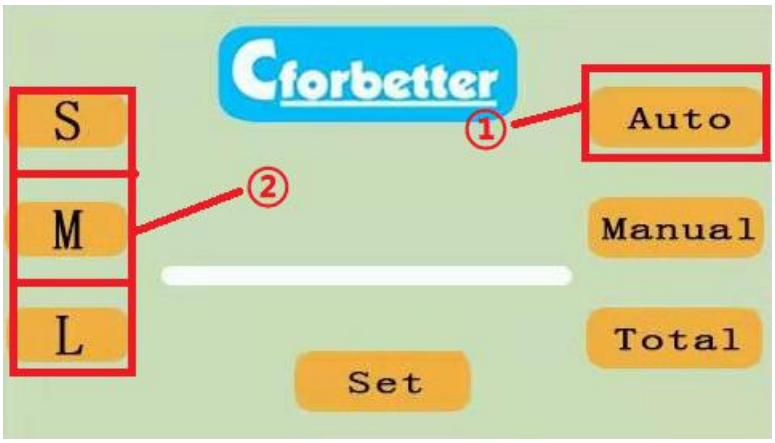

5. Auto Mode.

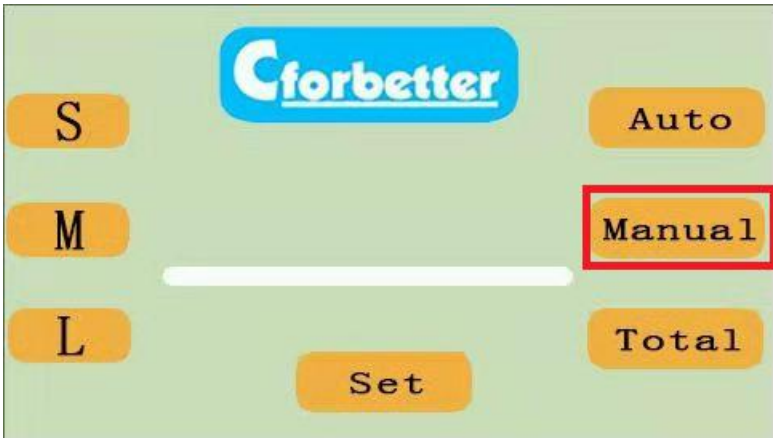

Press the AUTO button and then press size button you desire,press cup down on the nozzle,let the beer run and will stop at the desired level automatically.

Repeat as needed for other sizes.

6.Manual Mode

Select MANUAL, and press cup down on the nozzle,let the beer run until press MANUAL again to stop the flow.

7. Empty keg Indicator

There will be a pop-up window after the beer barrel is empty. "Please check the beer and gas is enough or not ."

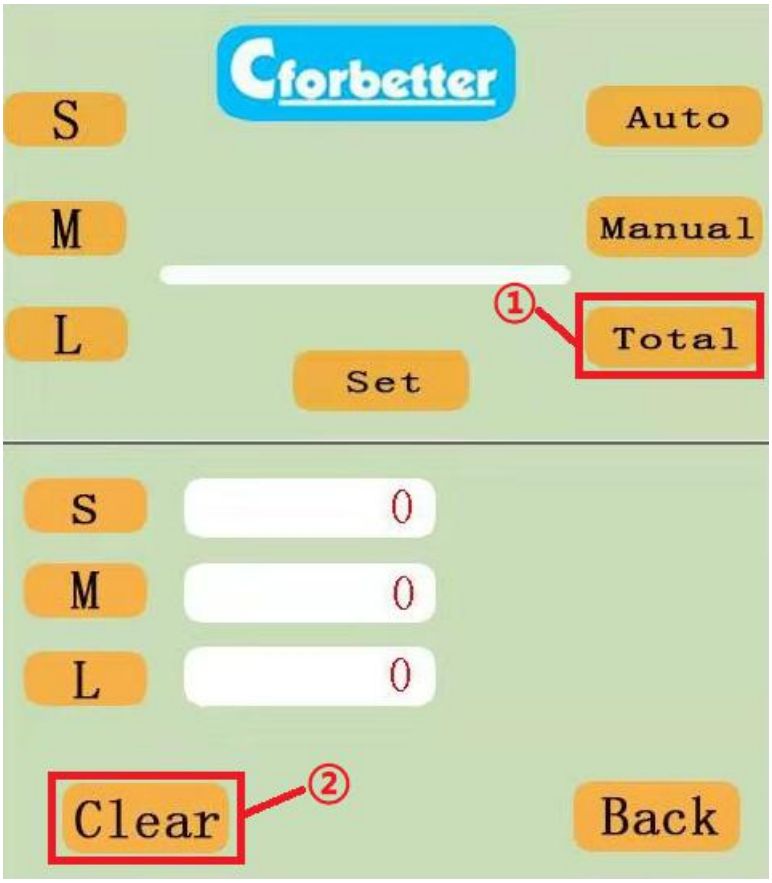

8. Metering

Press the TOTAL button to enter the cumulative interface, which will show you all size cups and how many cups you have dispensed for each size

Data clear：

Entering the cumulative menu, click“clear ”to zero the meter record.

9.After Use Cleaning

(1) General cleaning, wash the beer tubes and the drain rack with a cleaning tank and clear water, in the manual mode.

(2) For long-term non-use cleaning, refer to the general cleaning method, remove the nozzle counterclockwise, soak it with professional cleaning solution and wash it with clear water, then store in safe place for them to air dry.
